

# FiberLocator

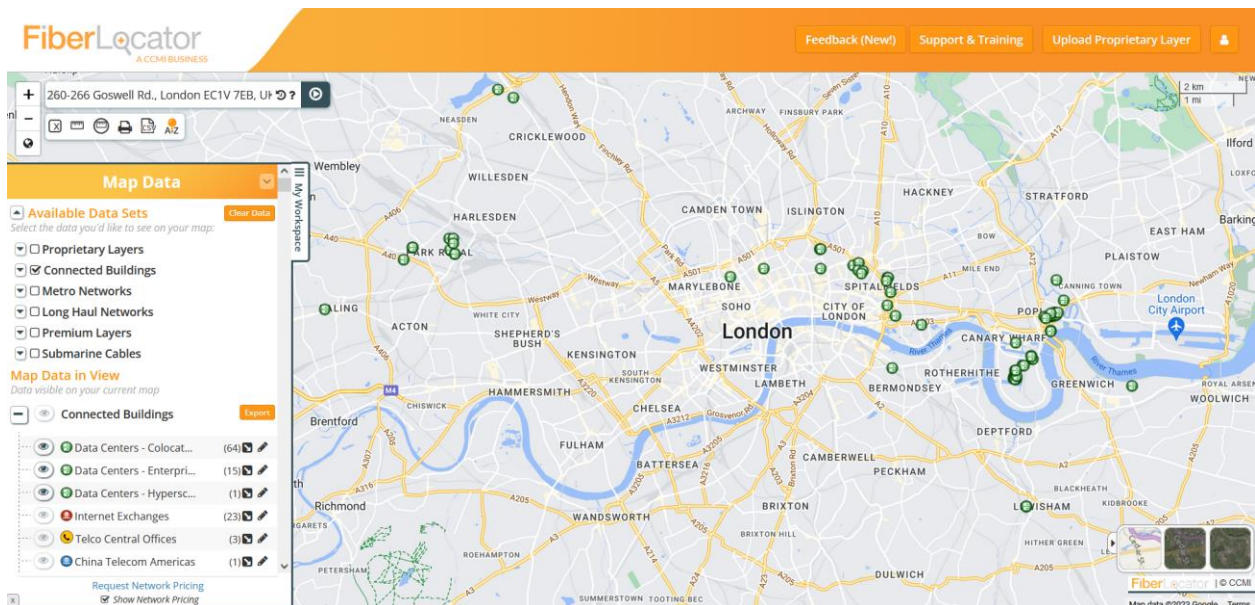

A CCMI BUSINESS

FiberLocator Release Notes  
December 8, 2023

## New Features

### 1 Enhanced datacenterHawk Data

- ❖ Data Centers broken out by type:
  - **Data Centers – Colocated** - A data center facility owned by a provider where infrastructure is leased instead of owned, often with multiple other users present.
  - **Data Centers – Hyperscale** - Facilities owned or leased by companies with larger requirements, building or leasing 20 MW or more at a time or gradually expanding to that number over time in 5-10 MW sectors.
  - **Data Centers – Enterprise** - Data centers built by a company to be solely utilized as a resource for the business owning the facility.

## API Changes

- ❖ Users of the data\_centers layer will need to update their code to use the following layer names.
  - data\_centers\_colocated
  - data\_centers\_hyperscale
  - data\_centers\_enterprise
